

THE NIAGARA^{AX} FRAMEWORK[®]

Tridium, Inc.

Tridium is a leading provider of software solutions for building automation systems (BAS) and energy management systems (EMS). Our products are used in a wide range of applications, including commercial buildings, industrial facilities, and data centers.

Tridium's software solutions are designed to help building owners and operators reduce energy consumption, improve system efficiency, and enhance occupant comfort. Our products are easy to install and use, and they provide a high level of flexibility and scalability.

Tridium's software solutions are available in a variety of languages and platforms, including Windows, Linux, and Java. Our products are also compatible with a wide range of hardware devices, including sensors, actuators, and controllers. This makes it easy to integrate our software solutions into existing building systems.

Tridium's software solutions are supported by a team of experienced engineers and technicians. We provide comprehensive training and technical support to our customers, ensuring that they can get the most out of our products.
