

VYKON Niagara<sup>AX</sup>  
Compatibility  
Statement (NiCS)

Includes all VYKON  
branded JACE and  
Software Products

## VYKON Niagara<sup>AX</sup> Compatibility Statement (NiCS)

Includes all VYKON branded JACE and Software Products

The following information describes Tridium's VYKON branded Niagara<sup>AX</sup> product licensing.

Tridium's VYKON AX branded products utilizes an open access licensing procedure. VYKON AX branded products can be connected to and managed by any Niagara based tools or systems without the need to modify the license. This means the end user does not have to authorize changes to a VYKON AX license for another systems integrator to gain access to the system. The end user does need to have the necessary user names and passwords installed by the original system integrator so they can be used by another Niagara trained system integrator.

The following is an explanation of the VYKON licensing scheme.

### *BrandID*

Every licensed station and tool has a Brand Identifier (BrandID). This field holds a text descriptor that the OEM chooses as the identifier for its product line. Each station or tool can have only one BrandID entry.

Tridium's VYKON products have the following:

**BrandID = VYKON**

### *Station Compatibility In*

This field is a list of brands that this local station will allow Niagara AX data to come in from. Simply stated from the point of view of a JACE, "this is the list of brands that can I can accept data from". Tridium's VYKON products contain:

**Station Compatibility In = All (In the actual license ALL is define by an \*)**

*Note: The compatibility fields can contain; a single brand "ABC", a list of multiple brands "ABC, XYZ", no brand*

**"None" or all brands "All".**

### *Station Compatibility Out*

This field is a list of brands that this local station will allow Niagara AX data to be shared with. Simply stated, "This is the list of brands that I can share data with". Tridium's VYKON products contain:

**Station Compatibility Out = All**

#### *Tool Compatibility In*

This field is a list of brands that this station will allow to be connected to it for engineering of its application. Simply stated, "This is the list of brands that can engineer me". Tridium's VYKON products contain:

**Tool Compatibility In = All**

#### *Tool Compatibility Out*

This field is a list of brands that this tool is allowed to connect to and engineer. Simply stated, "This is the list of brands that I can engineer". Tridium's VYKON products contain:

**Tool Compatibility Out = All**

As long as VYKON branded products are purchased by the end user any Tridium Certified (TCP) system integrator can provide support for the end user without the need for the owner to be involved in the licensing process.
