VYKON to Show Intelligent Building Automation, Security and Energy Management Solutions at 2011 AHR Expo

RICHMOND, VIRGINIA - January 13 2011 - VYKON will be featuring its full line of Niagara Framework based intelligent building automation and control, security and energy management solutions that are meeting today's challenges of real-world integration and interoperability at the 2011 AHR Expo in Las Vegas, January 31-February 2. The company will be located at **Booth # 5756**.

On hand will be the latest portfolio of hardware and software designed for building automation, energy management, remote monitoring and control applications including the VYKON JACE family of embedded controllers, option cards and IO modules, VYKON Security, VYKON Video, VYKON Wireless, VYKON Energy and VYKONstats. In addition, several VYKON partners will be on hand to demonstrate and their specific applications.

On the hardware side, VYKON will have new additions to its portfolio of intelligent building controllers including the new JACE NXT, a Windows-based, high performance controller configured with the full functions of the Niagara Framework®. Also on display will be a JACE-600 that is ARRA compliant and a new Z-Wave Driver and Option Card.

On the Security side, the group will be demonstrating VYKON Security 2.1, the latest release of our access control and security management solution and VYKON Video which provides seamless integration between today's building applications and digital video recorders, IP cameras, network video recorders, and video management solutions.

About VYKON

VYKON®, is a comprehensive set of applications that synchronize, manage and control major building system functions required in a facility, such as heating, ventilating, and air conditioning (HVAC) systems, energy, lighting, security, fire, safety, and unitary devices. Built on Tridium's Niagara Framework®, VYKON integrates diverse systems and devices - regardless of manufacturer, or communication protocol - into a unified platform that can be easily managed and controlled in real time over the Internet using a standard web browser.

VYKON enables facility managers, building owners, and systems integrators to integrate proprietary and otherwise incompatible products into a unified enterprise solution. This allows personnel using a standard web browser to measure, manage and control a wide variety of facilities, security and energy applications from anywhere in the world.

Additional information about VYKON is available at www.vykon.com.
