

VYKON by Tridium to Exhibit at the 2009 AHR Expo

Intelligent Building Automation and Control Solutions Provide Open Integration and Interoperability for Building Automation, Security and Energy Management

RICHMOND, VIRGINIA, January 5, 2009- VYKON by Tridium today announced that it will be showing and demonstrating its full line of open, intelligent building automation and control solutions at this year's AHR Expo, January 26-January 28 at McCormick Place, Chicago, booth # 3418. VYKON by Tridium solutions are powered by the Niagara^{AX} Framework[®] and make buildings better-ones that are smarter, use less energy, are more efficient, have lower operating costs, are safer and contribute to a sustainable environment.

On display will be the latest portfolio of hardware and software designed for facility management, remote monitoring and control applications including the VYKON JACE family of embedded controllers, VYKON security, VYKON video and VYKON energy applications and VYKONstats, a new line of communicating thermostats. In addition, several VYKON partners will be on hand to share their specific applications.

"These latest solutions we will have on display represent our ongoing commitment to our network of system integrators, contractors and end user customers who demand building solutions that are open as well as smart," said Ed Merwin, director of field sales for VYKON. "Our customers continuously work to accelerate intelligent facility management deployments and delivery in today's competitive marketplace and VYKON is with them every step of the way with high-quality and cost-effective solutions that stand up to these challenges."

About VYKON by Tridium

VYKON[®] by Tridium is open intelligent building automation and control solutions that meet all the challenges of real-world integration and enterprise connectivity and ensures complete interoperability among diverse facility systems.

Powered by the Niagara Framework, VYKON Solutions enable facility managers, building owners, and systems integrators to integrate proprietary and otherwise incompatible products into a unified enterprise solution through the synchronization, management and control of major building system functions vital in a facility, such as heating, ventilating, and air conditioning (HVAC) systems, energy, lighting, security, fire, safety and more.

VYKON solutions are available worldwide through a network of authorized distributors, systems integrators and value-added resellers. More information is available at www.vykon.com.
