

## **Record Number of Delegates Gather to Discuss the Latest in Automation, Integration and Smart Services at the 2009 Niagara Forum Europe**

**Old Windsor, England, April 1, 2009**– Tridium, Inc. announced today that its 2009 Niagara Forum Europe held on March 30th and 31st was a tremendous success that brought together a record number of attendees. The Niagara Forum Series along with the Niagara Summit are the definitive conferences for industry professionals and practitioners developing applications and deploying solutions built around open, interoperability, integration and connectivity.

Attracting over 180 participants, an increase of 80% over the previous Niagara European Forum held in 2007, delegates attended various workshops, presentations and technical sessions encompassing all aspects of automation, integration and smart services technology.

This year's conference theme "Expanding Boundaries" offered sessions on industry topics that covered a range of business and technical subject matter including the latest in Niagara based solutions and enterprise applications, wireless technology, energy management, smart services and the Sedona Framework, Tridium's open source development framework that distributes decision making control and manageability to any device and brings intelligence and connectivity to the network edge and back.

Marc Petock, Tridium's Vice President, Global Marketing & Communications attributed the success to "the continued expansion of the Niagara Framework as an automation infrastructure and platform for delivering smart services and the drive throughout the region to make buildings smarter, use less energy and operate more efficiently."

Commenting on the event, Terry Casey, President EMEA for Tridium, said, "This strong attendance by our customers and partners was fantastic and highlights the acceptance of Niagara as the technology of choice within the region. The Niagara Forum provided a valuable opportunity for everyone in our ecosystem to come together and gain better insight into leveraging our applications and solutions for meeting today's integration and automation challenges."

### **About Tridium, Inc.**

Tridium is the global leader in open platforms, application software frameworks, automation infrastructure technology and device-to-enterprise integration solutions. Our technologies extend connectivity, integration and interoperability to the millions of devices deployed in the market today and empowers manufacturers to develop intelligent equipment systems and smart devices that enable collaboration and communication between the enterprise and edge assets.

The Niagara Framework® is a software platform that integrates diverse systems and devices regardless of manufacturer, or communication protocol into a unified platform that can be easily managed and controlled in real time over the Internet using a standard web browser.

The Sedona Framework™ is the industry's first, open source development framework that provides a complete software platform for developing, deploying, integrating, and managing pervasive device applications at the lowest level. It brings the power of programmable control and the Internet down to extremely inexpensive devices. The Sedona Framework distributes decision making control and manageability to any device and brings intelligence and connectivity to the network edge and back.

The company is an independent business entity of Honeywell International Inc.
