

NIAGARA DATA SERVICE™

First release of the niagara
cloud SUITE™

FEATURES OVERVIEW

VYKON

by TRIDIUM

niagara cloud SUITE™

Niagara Cloud is a scalable Microsoft Azure cloud-based solution that provides secure, remote building management services in accordance with Tridium's model of open and extensible integration with devices, services, and applications.

PREREQUISITES:

- Niagara Framework® ~ Supported Versions
- Active Software Maintenance Agreement

niagara cloud SUITE™ = MAJOR NIAGARA PLATFORM EVOLUTION

BENEFITS:

- Opens Future Growth Paths
 - Supports standards
 - Supports partner collaborations

BENEFITS:

- Removes Budget Obstacles
 - SaaS: Pay-as-you-Go
 - OpEx, not CapEx
- Flexibility & Productivity
 - For the SI
 - For the end-user

BENEFITS:

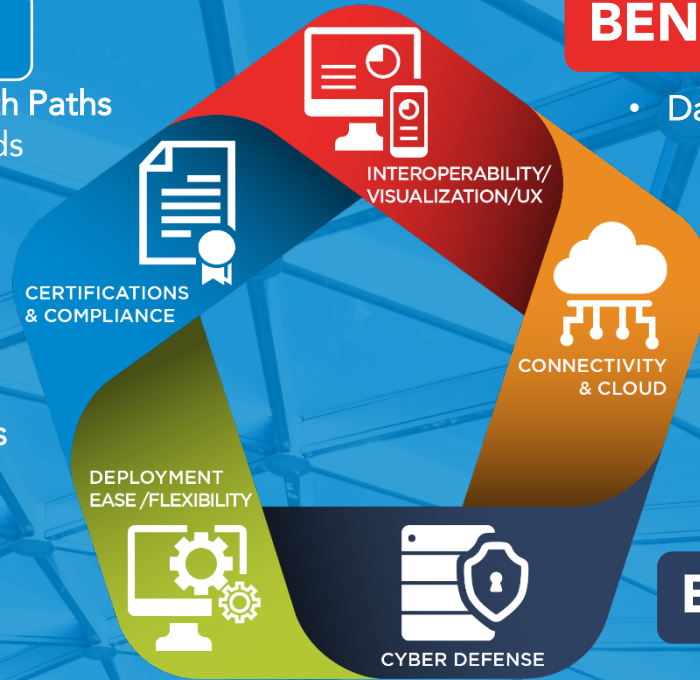

- Data Interoperability
 - Moves and stores Niagara Histories = Trend Data Enriched with Tagging
 - Contextualized data is ready for analytics and AI applications

BENEFITS:

- Connects to Any Customer-Demanded Application
 - API-First Architecture

BENEFITS:

- No Add-on Gateways Needed

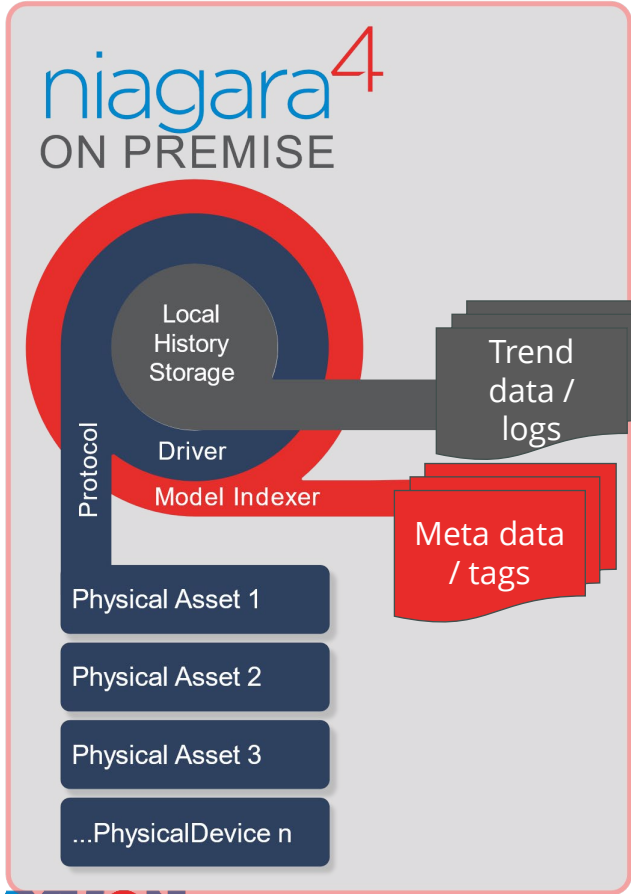

Niagara Framework is always evolving along five dimensions.

niagara
First **cloud**^{SUITE} Service Available: **NIAGARA DATA SERVICE™**

Notable Niagara Data Service Features:

- API Architecture: Enables easy connection to 3rd-party applications
- Contextualized Data for Trend Analysis — Supports Data Interoperability
- **niagara cloud**^{SUITE} Management Portal — Enables charting, shareable with customers

More on these to Come....

NIAGARA DATA SERVICE PREREQUISITES

SUPERVISOR

JACE

Niagara Framework Versions:

- Niagara Long Term Support (LTS) version [4.10]
- Current Feature Version [4.12] when released
- Requires active Software Maintenance Agreement (SMA)

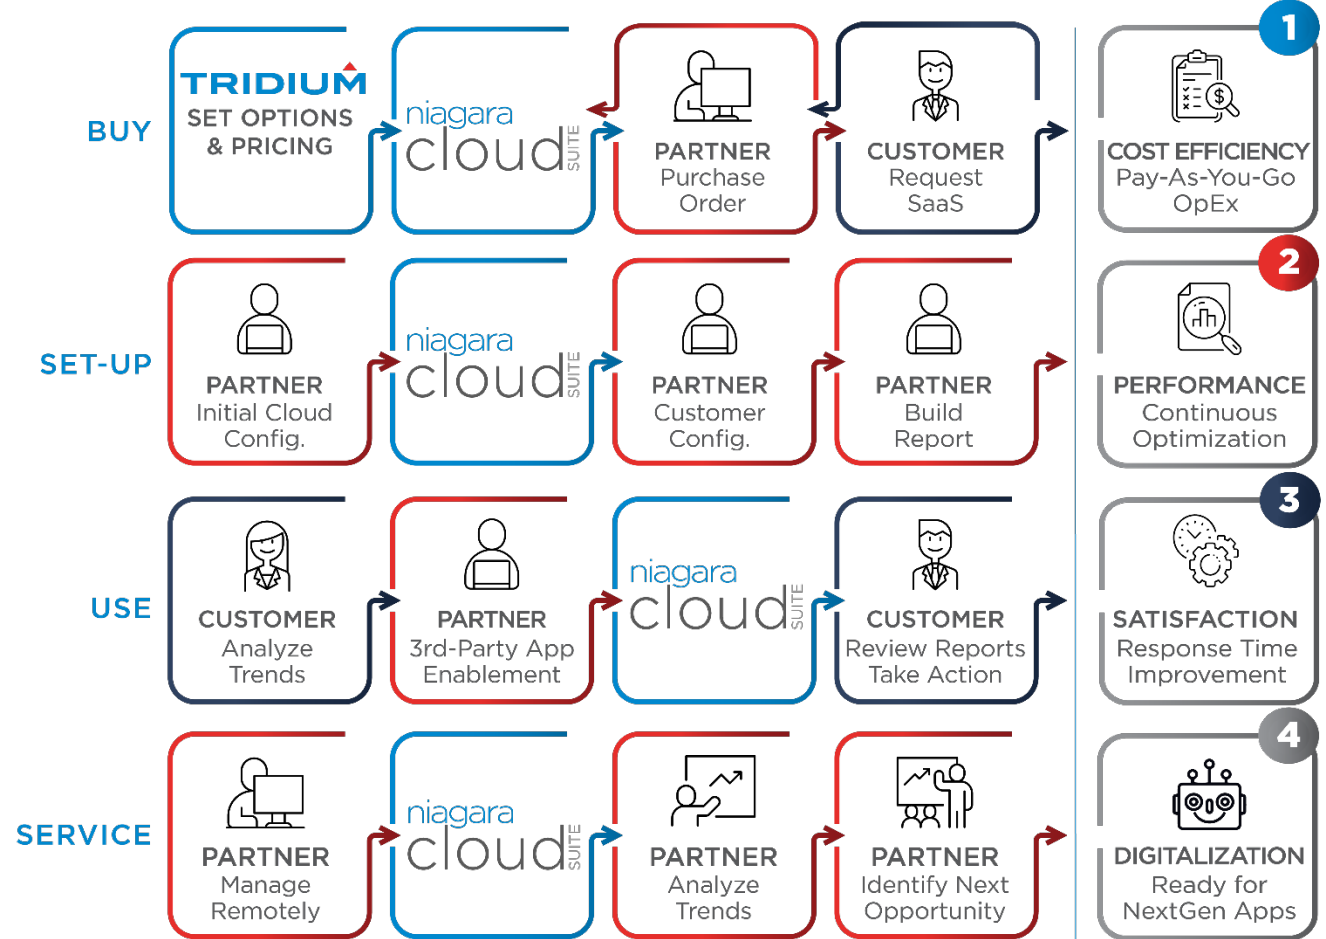

Initial Release to be available in US only

HOW NIAGARA CLOUD SERVICES WILL WORK

NEW SOFTWARE AS A SERVICE PROCESS

BENEFITS

NIAGARA DATA SERVICE ADVANTAGES

Easy integration of a Niagara network with the Niagara Cloud and archived historical data

Automatically detects and sends all historical data OR user can pick and choose which histories to send

Contextualized by the Niagara data model. Tagged data example: 72 [RTU1, degrees, Fahrenheit, Richmond, VA, Outside Air, Building 51]

Automatic configuration of Niagara Archive History Provider (4.12+)

3rd Party applications can access Niagara Data Service via cloud (API)

niagara
cloud SUITE™

NOTABLE FEATURE #1: API Architecture

KEY BENEFITS:

- Built-in APIs support secure extraction and import of Niagara data to preferred 3rd-party business intelligence and data modeling tools
- One cloud storage location allowing for multiple third-parties to access Niagara fully contextualized data. **No need for gateways**
- Predefined JSON payloads for cloud export. Saves time. Makes it scalable. Reduces errors.

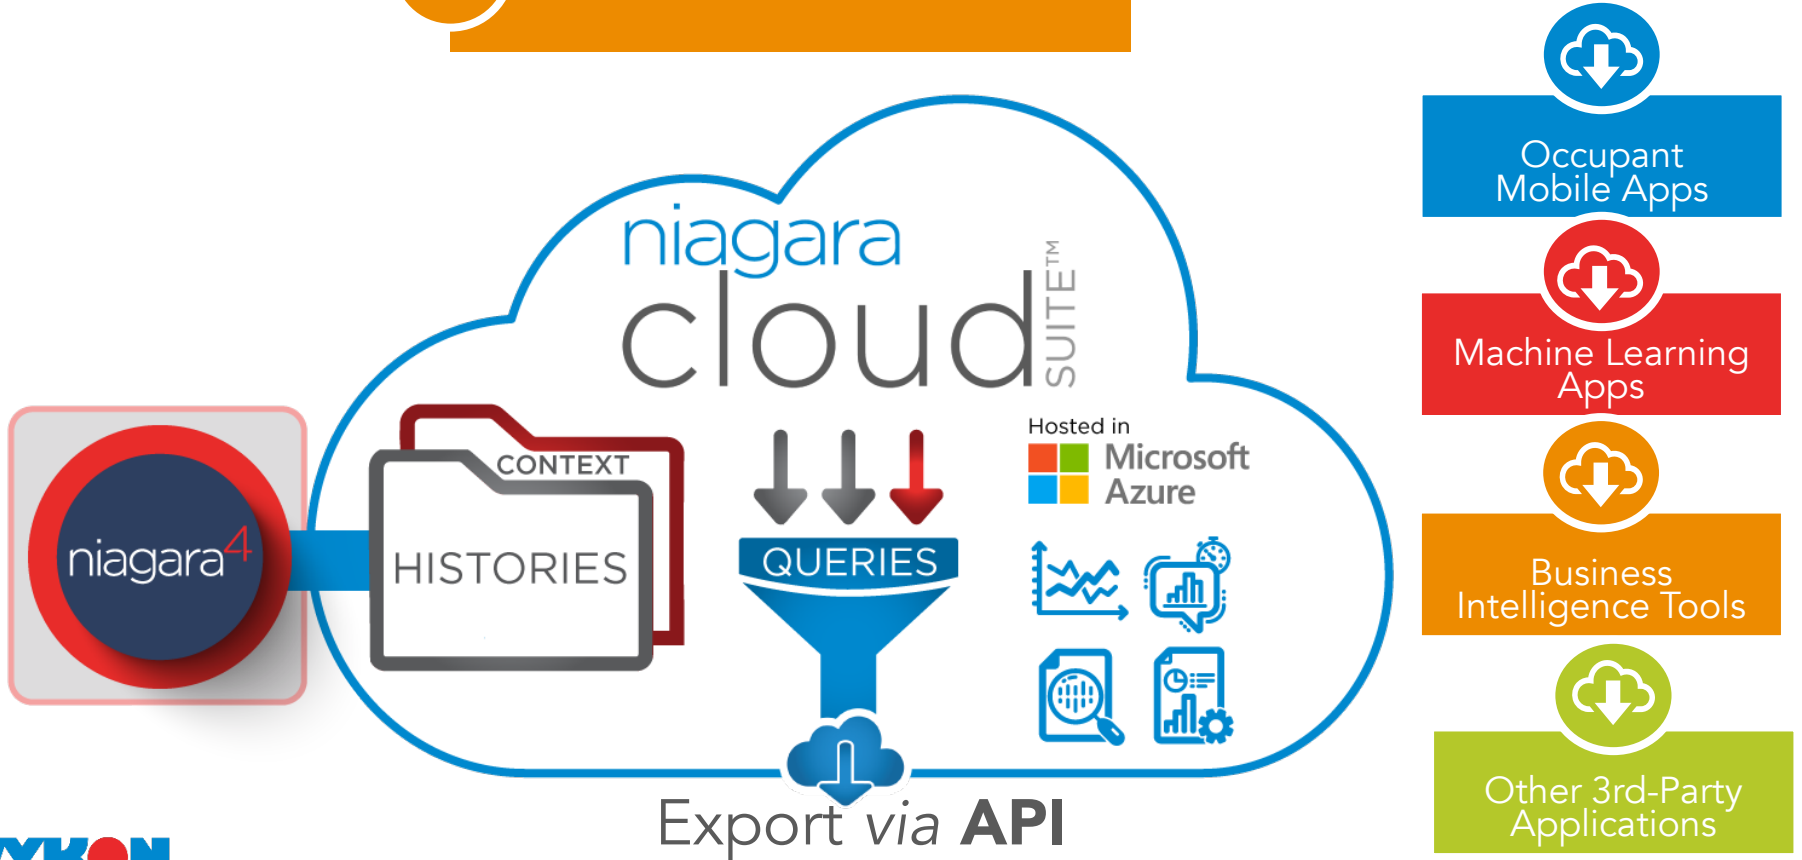

CYBER DEFENSE BENEFIT:

- Addresses most Common IT Objection

More about:

API Architecture

NOTABLE FEATURE #2: Contextualized Data for Trend Analysis

KEY BENEFITS:

Eases Data Normalization and Integration for all Downstream applications

- Upload, store, analyze Niagara histories with model data

Flexibility & Productivity

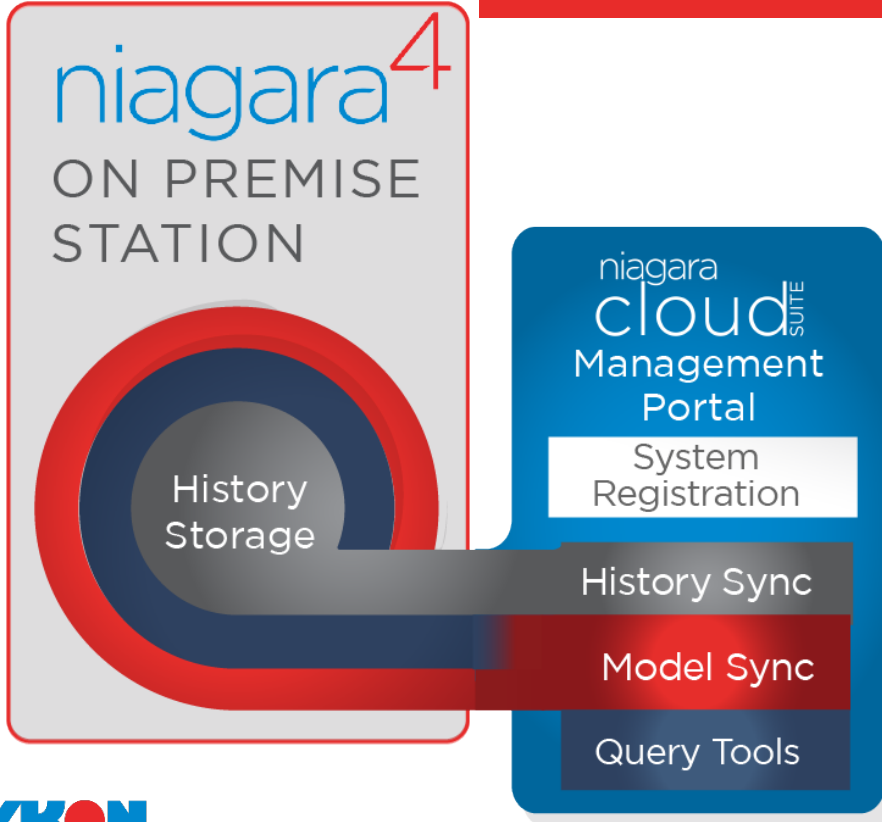

- View histories on-demand from on premise Niagara Station via Station WebChart

Meet Data Ownership Requirements

- Copy of data can be stored locally and managed as archive, up to user's discretion
- Tridium does not own the end user's data

More about:

Contextualized Data for Trend Analysis

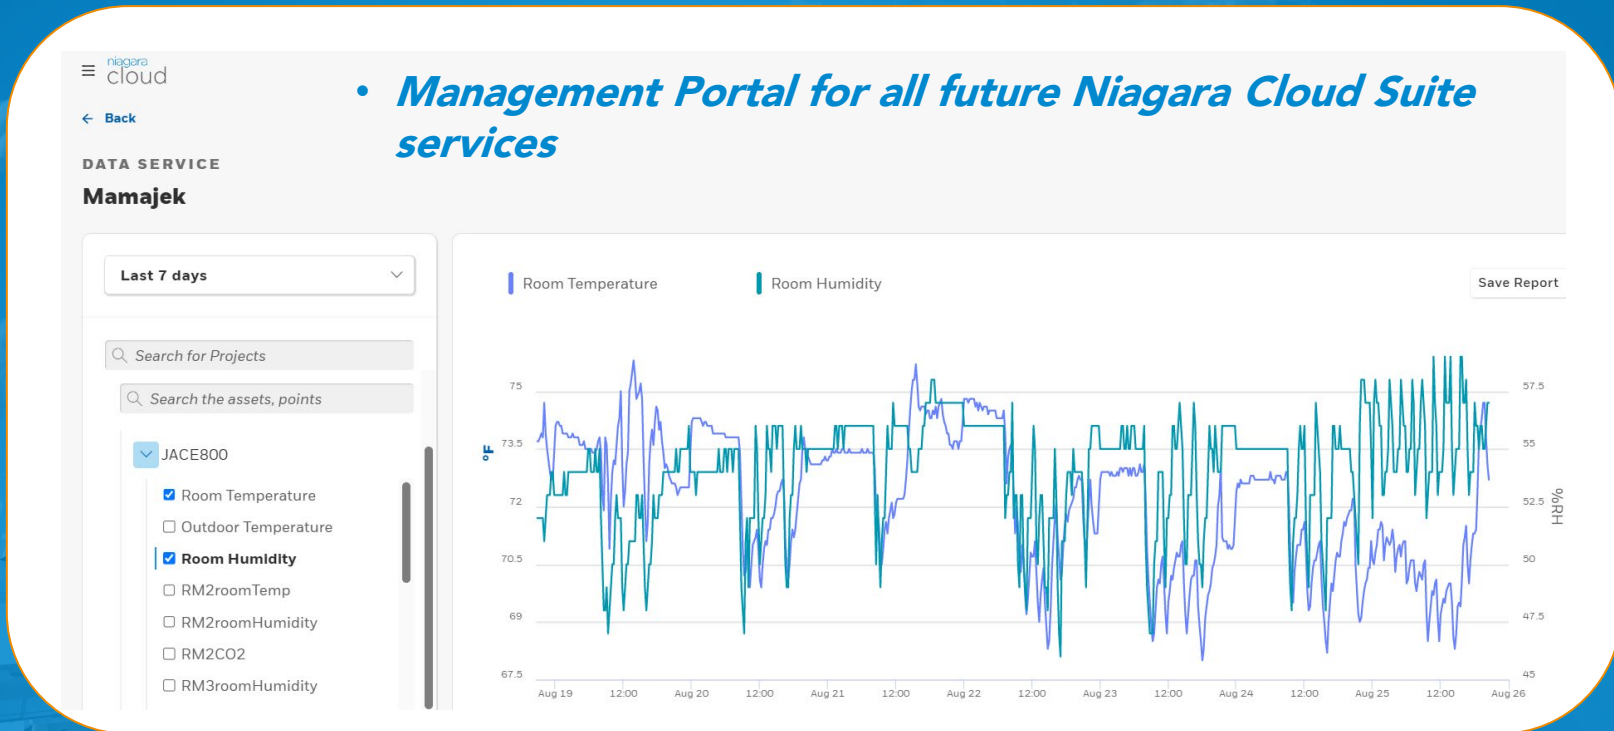

"By pushing operational data from Niagara to the cloud, Tridium has simplified the acquisition and normalization process allowing us to seamlessly integrate our AI-based intelligent building solutions in a fraction of the time."

Jeff Kimmel, CEO of Elipsa, Beta User

NOTABLE FEATURE #3: **niagara** cloud SUITE Management Portal

KEY BENEFITS:

- Easy data and subscription management
- Built-in charting, shareable with customers

More about:

niagara cloud SUITE Management Portal
