Niagara AX updates available

Versions 3.6, 3.7, and 3.8 are affected

The August 2015 Update Releases are available for download on Niagara Central. The updates include important enhancements that increase the security of a Niagara AX system, including a newer revision of the Java Virtual Machine. **VYKON strongly encourages all customers to update Niagara AX to one of the newly available releases.**

In addition to security enhancements, these updates have resolved many issues. Click the links below to find the release notes on Niagara Community:
